INTRODUCTION

YourKiss Token is a decentralized BEP20 community-driven dating token, to bring scam free dating platform along with options of passive income deploying on binance smart chains for the first time to bring passive feature income hardcoded into our contract to top until it reaches a threshold. This factor implies that users or the project's team built on the Binance Smart Chain network will be extremely safe and rewarding on the spot for long-term holders and a chance for them to find their love. It is a platform that values our users' monetary investments and time, as evidenced by its tagline, " More inReturn". By keeping our word, we hope to fulfill our promise to make your investment worthy. We have a community channel on the iRC undernet network.

VISION

The best recognizable effect, we feel, is when members enter the market, earn and find love because we believe that finding love should be free. It will be overwhelming for novices to the decentralized organic framework. We emphasize cultivating a stage that will construct an emblematic astronauts' adventure experience while additionally giving decentralized and passive income features that will entice newcomers to stay, whether as dealers or stage customers. We recognize that, by enabling this environment, we must also support the current vertical model's reasonableness. Our foundation intends to be risk-free by providing a secure or trustworthy environment. Our vision is to bring love with a twist of crypto passive income options and no compromise on the safety and confidentiality of the token holders and users' data. We aspire to launch a platform in the future both on the play store and app store to bring the love one step closer to you.

MISSION

We intend to satisfy our vision of a sound climate by making a reliable climate for peers by keeping up the standards and protocols of our community and bringing the best for them to educate themselves and take a step further into the professional domain. We are not reluctant to execute changes to our arrangement for everyone's benefit of our local area of incorporating cryptocurrency and dating. We aim to launch a token with rewards expect to develop and acquire an after of forthcoming clients are upheld vigorously by our promoting efforts to our loyal users. We will present a platform that would be transparent and scam free.

YourKiss's purpose is to provide a secure environment for exchanging valuable crypto while remaining decentralized and getting continuous rewards by HODL tokens in their wallet. We are grateful to the holders who will assist us in significantly expanding our business, and we will continue to develop this environment to bring steadily more invested persons to the stage.

BENEFITS

Our platform intends to provide the following benefits to our investors:

STEP
01

Reduce turbulence

STEP
02

Reward the holders

STEP
03

Avoid market manipulation

STEP
04

Fully flexible

STEP
05

Protecting the holders from whale
manipulation

STEP
06

Drastically reduce price volatility

STEP
07

Safe and secure

YOURKISS ECOSYSTEM

DECENTRALIZED PLATFORM

YourKiss is a community-led platform that people make for the people. Our users can decide on the network's development plans. It boosts the organization's transparency and makes it less prone to shark manipulation. Fairer service can be provided by decentralizing platform administration and resources. Our token can also be exchanged or converted to fiat currency without involving any third party or central organization. Cryptocurrency's decentralization is what makes it trustworthy.

The Benefits of Decentralisation are

- Subordinate Motivation
- Expansion and diversification.
- Making quick decisions.
- Efficient Communication.
- Ease of Expansion.
- Better Supervision And Control.
- Satisfaction of Human needs.

DEFLATIONARY TOKEN

YourKiss is a hyper-deflationary token that is empowered by BSC. It is a hyper deflationary symbol whereby every time a symbolic trade takes place, falls in absolute stock. Deflationary has a cycle that allows you to decrease the price supply of a token, such as burning the deal or buy-back and burning. It is a deflationary coin with a clever staking system and a strong framework for marking. Staking is the means to hold assets in the money wallet of cryptography. Customers profit depending on the arrangement they choose from their speculation. Some companies, like day by day or every year, want to explore.

OUR WORKING PROTOCOLS

BINANCE SMART CHAIN

Binance is one of the most well-known cryptocurrency blockchains in the industry right now. Binance has created Binance Chain, a blockchain network with a variety of features. Binance Chain was designed specifically for use with the Binance DEX. Its goal was to speed up transactions to binance. Smart Chain (BSC) is a blockchain network that allows smart contract-based applications to be executed.

The following are some advantages of the Binance Smart Chain:

- Low transaction fees of as little as one cent
- Cross-chain Defi techniques that improve Defi interoperability
- High performance with a network capable of producing a block every 3 seconds
- Cross-chain Defi mechanisms that increase Defi interoperability
- A supportive Binance ecosystem that funds and bootstraps many Defi projects

OUR WORKING PROTOCOLS

HOW OUR ECOSYSTEM WORKS?- OUR THRUST SYSTEM FEATURES

We are here to make it easy for all age groups and enjoy entering our Platform and making dating scams free with the touch of earning rewards, and they would not feel regret. We work on the BSC blockchain, which provides numerous benefits, including smart contract safety and confidentiality, low gas fees, and the fastest block time.

Our Platform is decentralized to the core, and affordable is its cost. YourKiss is BSC-operated automatic liquidity and burns tokens, allowing users to stake rewards and giveaways.

Our ecosystem works in 4 domains:

- 1-BURN
- 2-REDISTRIBUTION
- 3-LIQUIDITY
- 4-MARKETING AND DEVELOPMENT

BURNING

The decision to burn tokens is vested in the developer team of the coin by acting upon the strategy of sending cryptocurrency tokens to a wallet with no access key. Without the private key, these tokens cannot be accessed and lost forever. We intend to save our Platform from sharks and whales by burning a sure 40.01 % of our token supply every time someone buys our token. This protects our ecosystem from crashing and attacking sharks and whales.

LIQUIDITY LOCKED

Every trade contributes towards auto-generating liquidity that goes into multiple pools used by exchanges. The token developers can engage in the famed "rug pull if liquidity is unlocked." Our Platform offers our users a liquidity-locked system by locking a 10% from the distributed token supply. Liquidity is locked by delivering liquidity pool (LP) tokens to a time-lock smart contract for 360 days on pancake swap. Developers cannot recover funds from the liquidity pool unless they own LP tokens. This gives investors assurance that the token developers will not abscond with the liquidity funds. It is now standard practice for all token creators, distinguishing a fake currency from a legitimate one.

REDISTRIBUTION and REWARDS to Holders

We want to present a platform for participants to earn passive income. Along with the revolutionizing crypto market, we tend to have a unique set of token distributions where every platform user would not feel left out. That's why out of our circulating supply we distribute 17.05% tokens to holders, 6% rewards will be put into a wallet which will distribute among the holders.

MARKETING AND DEVELOPMENT

One of our mission is to bring reforms to the Platform from time to time and not just leave the platform development after launching it for public use; that's why we have inbuilt marketing and development budget. We are not offering presale or ICO to the buyer but also setting aside a 0.5% for marketing tax of the Platform for updating it and expanding our community on a greater level for fulfilling the marketing strategies we have planned.

BUYBACK

We are launching a platform where we are also addressing the 2% auto buyback feature which is one of our strategies to reassure our users of the stability and increasing token value of our token. In this way, we will also be reusing our token back into the marketing and development of our platform and into the circulating supply as well.

TOKENOMICS

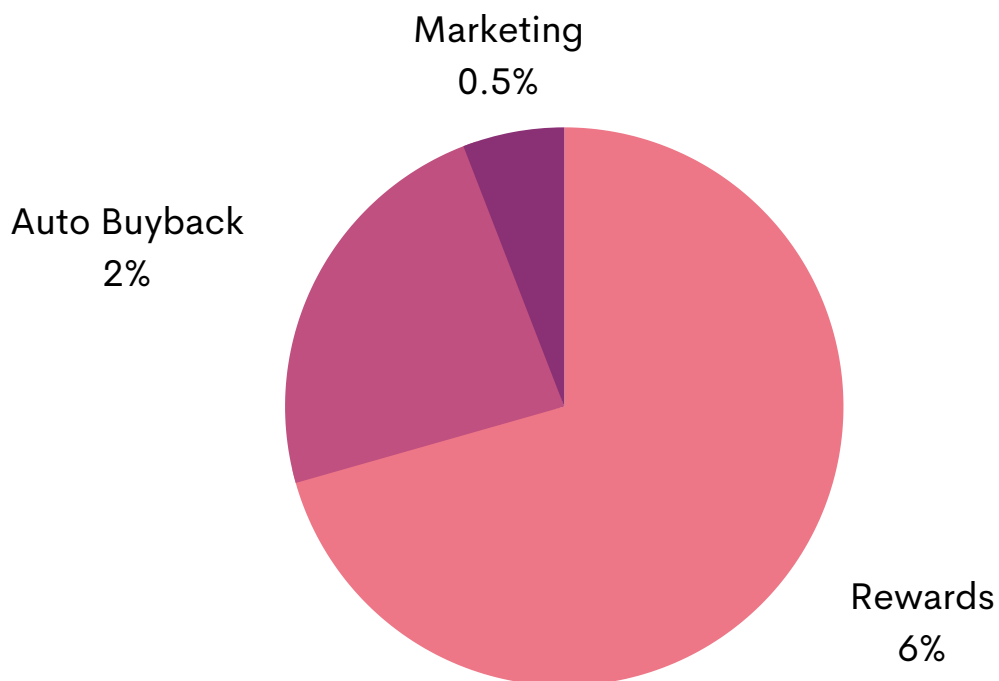

TOKEN DETAILS

01	TOKEN PLATFORM YOURKISS
02	TOKEN NAME YOURKISS
03	TOKEN SYMBOL \$YK
04	TOTAL SUPPLY 100,000,000,000,000
05	CIRCULATING SUPPLY 100,000,000,000,000
06	DECIMAL 9
07	HOLDERS 20

DISTRIBUTION OF TOKEN

ROADMAP

STEP 1

- 1- Team building
- 2- Whitepaper
- 3- Social media channels
- 4- Website Launch
- 5- Contract deployment
- 6- 40.01% Token Burn

STEP 3

- 1- Hype Campaign
- 2- Private Presale
- 3- Pancakeswap launch
- 4- Pancakeswap Liquidity
- 360 days Lock
- 5- 100 Telegram Members
- 6- 20 Token Holders

STEP 2

- 1- Full TechRate Audit
- 2- PooCoin Application
- 3- Deploy YOURKiSS on BSC
- 6- Add 3 Trading Pairs
